DETAILED ACTION
EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claim 17 has been canceled.

Allowable Subject Matter

Claims 1, 2, 5-11, and 13-15 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art of record fails to disclose or fairly suggest:

- A display apparatus, comprising: a display region where the plurality of first electrode patterns extend in parallel with one another at a first spacing; a terminal region where one ends of the plurality of first electrode patterns in the display region are arranged at a second spacing which is smaller than the first spacing; and a connection region where the plurality of first electrode patterns in the display region are respectively connected to the corresponding one ends in the terminal region, wherein each of the plurality of first electrode patterns has a lamination structure which has a first conductor having a first sheet resistivity, and a second conductor having a second sheet resistivity lower than the first sheet resistivity, in the connection region, each of the plurality of first electrode patterns

is provided with a higher resistance region where the second conductor is removed, the length of the higher resistance region is changed according to the length of the electrode pattern for each of the plurality of first electrode patterns, a portion of each of the plurality of first electrode patterns corresponding to the connection region is constituted by a segment A which extends slantwise with respect to the first direction in the display region and a segment B which extends in the first direction to the terminal region, the segment B is divided into a segment B1 that extends consecutively from the segment A, and a segment B2 which is the higher resistance region in each of the plurality of first electrode patterns, the second conductor is removed in a plurality of spaced apart places at a portion corresponding to the segment B1 in combination with the remaining claimed limitations as called for in claim 1 (claims 2, 5-11, and 13-15 are allowed for the same reasons since they are dependent from claim 1).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
